Residential & Commercial Pest Control Services Throughout Tucson, Arizona!

Insect Removal • Pest Control • Rely on 1st Choice Termite & Pest Control, Inc.

Termites eat anything, not just wood. Over time they can destroy a home from the inside out. According to the National Pest Management Association, termites cause as much as \$5 billion worth of damage every year. They'll eat anything containing cellulose, including books, cardboard, and the paper on drywall, slowly nibbling away your infrastructure. At **1st Choice Termite & Pest, Inc.**, we see there are two kinds of homes: those that have termites and those that will.

Termite damage is rarely covered by homeowner's insurance. The best defense is prevention and early detection. Regular inspection on a yearly basis is very important to protecting your investment. Call today to exterminate termites and other pests in and around your home - (520) 744-7877.

[Pest Control & Exterminating in Tucson](#)

Subterranean termite colonies can reach into the hundreds of thousands. We carry the Termidor® brand of termiticide, the industry leader in termite elimination. Termidor® is preferred by homeowners because it is simply the best and most effective treatment method for ridding your home of termites. Unless our customer requests otherwise, **1st Choice Termite & Pest, Inc.**, uses Termidor® exclusively.

Tips to Keep Bugs Away:

- Remove all trash, logs, boards, piles of debris, and other objects from around the home.
- Keep grass closely mowed near the home.
- Prune bushes and overhanging tree branches away from the house. Tree branches can provide a path to the roof for insects and rodents.
- Plug holes in exterior walls with steel wool, small mesh screen, or other suitable material.
- Caulk around eaves, pipes, and any other cracks into the home.
- Install screens in windows, sweeps under exterior doors, and weather-stripping.
